

Joining Materials (Part 1)

This activity was created by Amaris.

There are many different ways that materials can be joined together by taping, gluing, stapling and many others. Cut out the page below, find some household items and follow the instructions to see some good methods of joining different materials to paper.

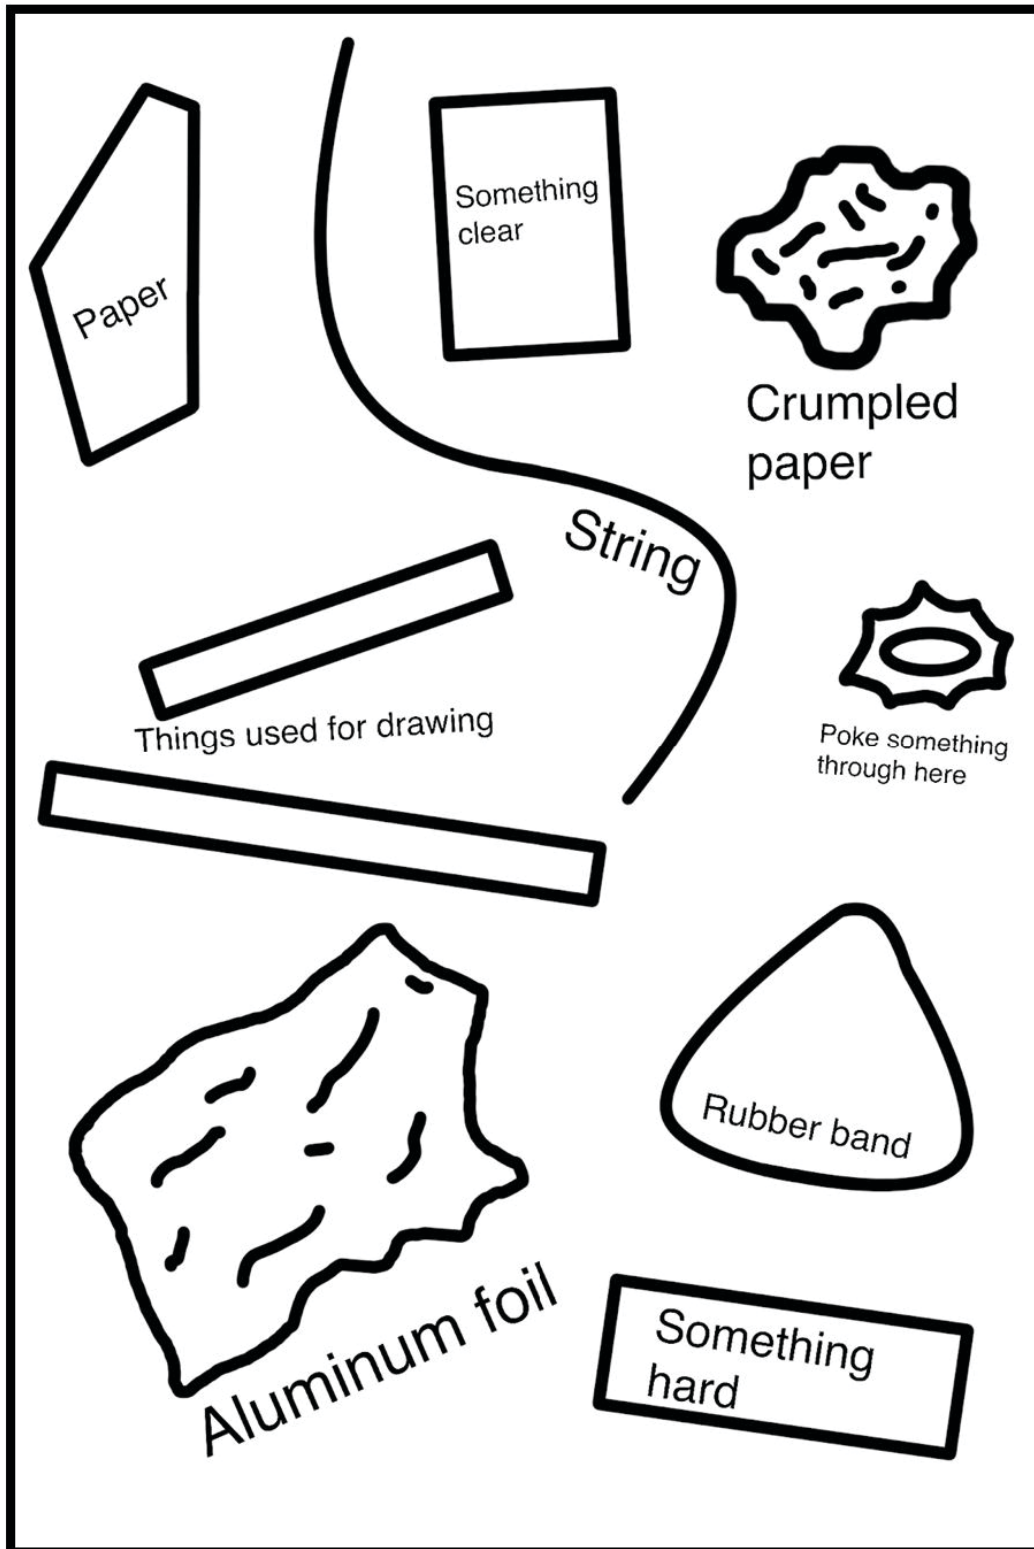

This page is intentionally left
blank, because the previous
page is meant to be cut up.

This activity continues on the next page!

Joining Materials (Part 2)

Now it's your turn! Cut out the page below and look around for some household items that meet the descriptions below and think of good ways to attach it to the paper. Try to think of as many methods as you can.

This page is intentionally left blank, because the previous page is meant to be cut up.
