

Layers of the Earth

This activity was created by Sophia.

Match the layer on the left side to its definition on the right side.

1 Atmosphere ●

2 Crust ●

3 Outer Core ●

4 Mantle ●

5 Inner Core ●

● A Low viscosity fluid and suffers violent convection currents.

● B The thickest layer of Earth, made up of viscous rock and in a constant state of motion.

● C Solid and slowly growing. Affects the Earth's magnetic field.

● D The thinnest layer of the Earth, and everything we can see.

● E The layer of gases surrounding the Earth.

Label the layers below!
