

## Was it built by nature or by humans?

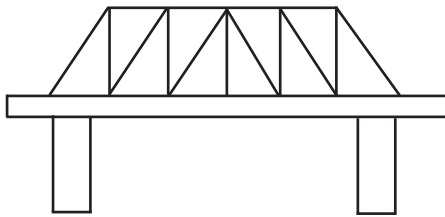

This activity was created by Zoe.

Structures can be made by nature, or by humans. Different materials are used to create different types of structures, and when humans plan to make a new structure, they think about how will it be used? How many people can fit in it? How tall or wide will it be? What climate will the structure be used in?

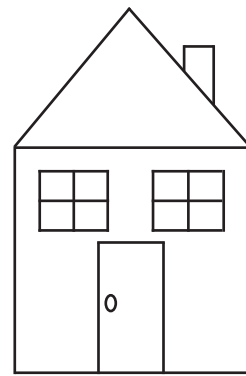

When it is built by nature, it either grows on its own, or is made by insects or animals.

Hello! Can you help me sort these structures into human built or natural?

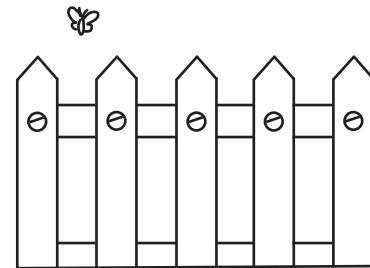

1. Bridge \_\_\_\_\_

2. House \_\_\_\_\_

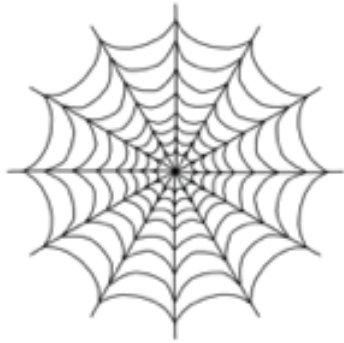

3. Tree \_\_\_\_\_

4. Wooden Fence \_\_\_\_\_

Date: \_\_\_\_\_

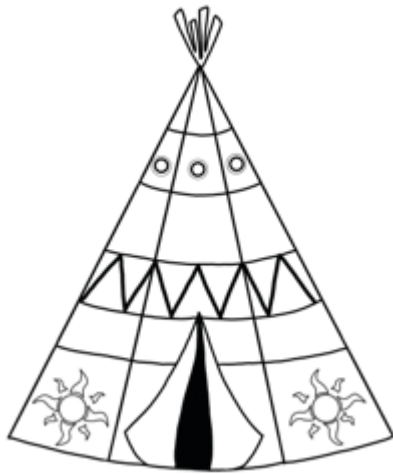

Name: \_\_\_\_\_

5. Spider Web \_\_\_\_\_

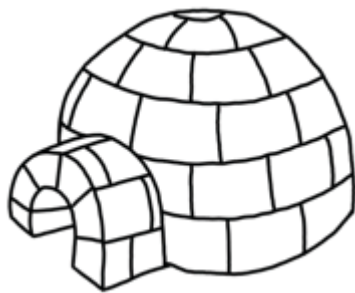

6. Beehive \_\_\_\_\_

7. Tipi/Teepee \_\_\_\_\_

8. Bird's Nest \_\_\_\_\_

9. Igloo \_\_\_\_\_
